

## Nebraska Health and Human Services System

# HEALTH ALERT NETWORK Advisory

#### Current Situation: (April 11, 2006)

- 59 Cases under investigation
- Epidemiology expects more

#### **Probable Cause:**

- Not vaccinated
- Failure to develop antibodies from vaccine
- No indications of bad lots of vaccine

#### **Laboratory Testing Recommendations:**

- State will cover IgM testing (complete panel for unusual manifestations).
- IgM most accurate 4 days after onset of symptoms.
- For testing to be covered, it must be authorized by the local or state health department and done at the Nebraska Public Health Lab 402-559-2440
- All other testing:
  - 1) IgG
  - 2) paired acute-convalescent IgG
  - 3) viral culture

should be referred to private reference laboratories and paid by insurance or patient. (if financial assistance needed, contact HHSS or NPHL at the numbers listed).

#### Reporting:

- See Case Definition at HHSS web site
- Required by State Law.
- Call Local Health Department Map attached
- OR call NE HHSS at 402-471-2937
